Physical Review Letters: The Inside Story

Dr. Kevin Dusling

Physical Review Letters, 1 Research Road Ridge,
New York, USA

Abstract: Physical Review Letters publishes over 20,000 pages of scientific content per year while maintaining its presence as the premier physics journal. The purpose of this talk is to shed light into Physical Review Letters editorial process and policy and address the many questions frequently raised by the thousands of active authors, referees and readers. I will discuss upcoming projects and policy changes that may affect you and reflect on how PRL needs to orient itself in the rapidly changing landscape of scientific publishing.

Time: 2:00pm, Tuesday, 16th December, 2014.

Location: Physics Building, Room 221B.

(Cookies and coffee will be served from 1:30 pm)
